

High Above [Calgary] - Ariel Video Montage

Posted by Jeff Stewart - 08 Oct 2014 11:38

Hello,

I have been flying my quadcopter around Calgary and have compiled a short video using some of the best shots. Please have a look and let me know if you have any questions.

This form of video capturing is attracting a load of attention. Your montages are very nice in places but it is a bit unstable to capture ones interest for a period of time. Some very nice shoots. How about having a go at it when there is sunrise or sunset?.
